

PATIENT MEDICAL REPORT

Patient Information

Name:	John Doe
Age:	58 years
Gender:	Male
Patient ID:	MRN-123456
Date:	January 9, 2026

Chief Complaint

Patient presents with severe chest pain radiating to left arm for past 3 hours. Reports shortness of breath, nausea, and excessive sweating. Pain described as crushing sensation, rated 8/10 in intensity. Patient has history of hypertension and smoking (20 pack-years).

Vital Signs

Parameter	Value	Normal Range
Blood Pressure	165/95 mmHg	120/80 mmHg
Heart Rate	102 bpm	60-100 bpm
Temperature	98.8°F	97-99°F
Respiratory Rate	22/min	12-20/min

Laboratory Results

Test Name	Result	Normal Range	Unit
Troponin I	2.5	0.0-0.04	ng/mL
CK-MB	45	0-25	U/L
Cholesterol (Total)	245	< 200	mg/dL
LDL Cholesterol	165	< 100	mg/dL
HDL Cholesterol	35	> 40	mg/dL
Triglycerides	220	< 150	mg/dL

Glucose (Fasting)	118	70-100	mg/dL
Hemoglobin	14.2	13.5-17.5	g/dL
WBC Count	11.5	4.0-11.0	10 ³ /μL

Medical History

Past Medical History: Hypertension (diagnosed 5 years ago), Type 2 Diabetes Mellitus (controlled with Metformin), Hyperlipidemia.

Medications: Lisinopril 10mg daily, Metformin 1000mg twice daily, Atorvastatin 20mg daily.

Social History: 30-year smoking history (1 pack/day), occasional alcohol use, sedentary lifestyle.

Family History: Father died of myocardial infarction at age 62. Mother has hypertension.

Clinical Assessment

Patient presentation is highly concerning for acute coronary syndrome. Elevated cardiac biomarkers (Troponin I and CK-MB) combined with typical angina symptoms and risk factors (age, male gender, hypertension, diabetes, smoking, family history) strongly suggest myocardial infarction. Immediate cardiology consultation and cardiac catheterization recommended.
